X.Org X11R7.5 on Darwin and Mac OS X
October 2009

1. Introduction

X11R7.5, a freely redistributable open-source implementation of the X Window System (http://www.x.org/) from the X.Org Foundation (http://www.x.org/wiki/XorgFoundation), has been ported to Darwin (http://developer.apple.com/Darwin/) and Mac OS X (http://www.apple.com/macosx/).

Most of the current work on X for Darwin and Mac OS X is centered around the XQuartz Project (http://xquartz.macosforge.org/) at MacOSforge (http://macosforge.org/). If you are interested in up-to-date status, want to report a bug, or are interested in working on X11 for Darwin, stop by the project website at http://xquartz.macosforge.org/
